PLANT A TREE; LEAVE A LEGACY

WHY ADOPT A TREE?

- ◆ Replenishes trees that were destroyed by the Israeli army, settlers and the Wall.
- ◆ Protects the land from further Israeli confiscation policy.
- ◆ Offsets carbon dioxide. Each tree planted helps to offset your environmental impact by consuming carbon dioxide.
- ◆ Supplies oxygen for human survival. Two trees supply enough oxygen for the survival of one person.
- ◆ Ensures that Ramallah will once again be green, and is the "Bride of Palestine"
- ◆ Fights Israeli misinformation that only it has "turned the desert green".
- ◆ Preserves the environment and the beauty of nature.
- ◆ Protects the land from erosion.

The American Federation of Ramallah adopted strategic plans which include the continuous connection to Ramallah. By planting a tree in Ramallah, you will have the opportunity to keep your legacy alive in Ramallah. You will also be a part of taking back the image of Ramallah and restoring it to once again be known as the

"Bride of Palestine".

By planting a tree in your name, you can help dispel years of propaganda about Palestine being a desert.
